

com.cinema\_seat\_booking.service.  
ReservationService.cancelReservation

com.cinema\_seat\_booking.dto.  
ReservationDTO.ReservationDTO

com.cinema\_seat\_booking.model.  
Reservation.getScreening

```
graph LR; A[com.cinema_seat_booking.service.  
ReservationService.cancelReservation] --> C[com.cinema_seat_booking.model.  
Reservation.getScreening]; B[com.cinema_seat_booking.dto.  
ReservationDTO.ReservationDTO] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two white rectangular boxes with black borders contain the following text: the top box has 'com.cinema\_seat\_booking.service.' followed by 'ReservationService.cancelReservation' on the next line; the bottom box has 'com.cinema\_seat\_booking.dto.' followed by 'ReservationDTO.ReservationDTO' on the next line. On the right, a gray rectangular box with a black border contains 'com.cinema\_seat\_booking.model.' followed by 'Reservation.getScreening' on the next line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both service and DTO components interact with or depend on the model component.
