

src/main/java/com/cinema  
\_seat\_booking/controller  
/ClientController.java

```
graph TD; A["src/main/java/com/cinema  
_seat_booking/controller  
/ClientController.java"] --> B["org.springframework.stereotype.  
Controller"]; A --> C["org.springframework.web.bind.annotation.  
GetMapping"]
```

The diagram illustrates the inheritance of the `ClientController.java` file. It is shown as a child of two parent classes: `org.springframework.stereotype.Controller` and `org.springframework.web.bind.annotation.GetMapping`. The parent classes are represented by light gray boxes, while the child class is in a darker gray box. Blue arrows point from the child box to each of the parent boxes.

org.springframework.stereotype.  
Controller

org.springframework.web.bind.annotation.  
GetMapping
