

com.cinema_seat_booking.service.
UserService.registerUser

com.cinema_seat_booking.service.
UserService.updateUserProfile

com.cinema_seat_booking.model.
User.setPassword

```
graph LR; A[com.cinema_seat_booking.service.UserService.registerUser] --> C[com.cinema_seat_booking.model.User.setPassword]; B[com.cinema_seat_booking.service.UserService.updateUserProfile] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two white rectangular boxes represent service methods: 'com.cinema_seat_booking.service.UserService.registerUser' (top) and 'com.cinema_seat_booking.service.UserService.updateUserProfile' (bottom). On the right, a gray rectangular box represents a model method: 'com.cinema_seat_booking.model.User.setPassword'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both service methods interact with or depend on the model's 'setPassword' method.
